

MLGQ25气动砻谷机

MLGQ25 气动砻谷机是本公司最新研发的具有世界前沿技术的新型砻谷设备，该机采用气动元件控制进料和松紧胶辊，性能优越，运行平稳，脱壳率高，密封良好无粉尘外溢，是现代化大型碾米企业理想的专用设备。

特点

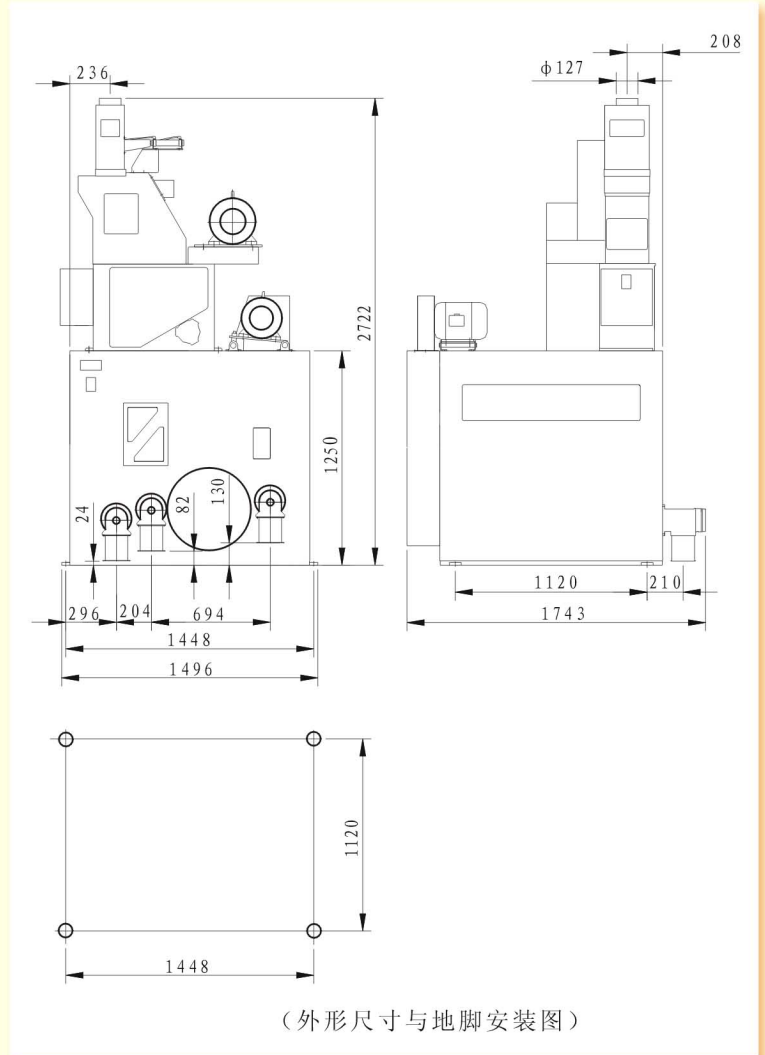

- 自动化程度高
实现无料时胶辊自动脱开，有料时胶辊自动合拢，料门和胶辊压力通过气动元件自动控制；
- 脱壳率高、产量高
脱壳率可达90%以上；
- 运转平稳
设备运转震动小，噪音低；
- 操作调节方便
辊间压力可通过调压阀直接调节，物料流量和风量通过调节手柄调节。

MLGQ25 PNEUMATIC HUSKER

Through a pair of rubber rolls, which rotate in opposite direction and differential, paddy will be husked. The rice bran and the mixture of paddy and brown rice will be separated by rice bran separator.

Feature

- high automation
Automatically unengaged without foodstuff, while with foodstuff, rubber rolls engage automatically. Feed gate and pressure between rubber rolls are controlled through pneumatic components.
- high husking yield, high output
Husking yield up to over90%, capacity 3.5~5.5t/h
- steady running
Less vibrating, low noise.
- convenient to operate
Pressure between rubber rolls can be adjusted directly by pressure valve, while material flow and air volume by adustable handle.

主要技术参数

型号Type	MLGQ25
处理量Output (t/h)	3.5-5.5
功率Power (kw)	7.5 (其他4)
胶辊规格specification of rubber roll (mm)	250
主轴转速Rotary speed (rpm)	1000
净重Net Weight (kg)	1170

通过ISO9001国际标准质量体系认证
