

TQLZ180振动清理筛

TQLZ180 振动清理筛适用于粮食加工厂、粮食仓库的原粮清理。不同规格的筛面可清理小麦、稻米、玉米、油料中的大、小轻杂。它设有两层筛面对含有大杂较多的粮食清理效果甚佳，还可用于食品、化工等行业的颗粒分离。

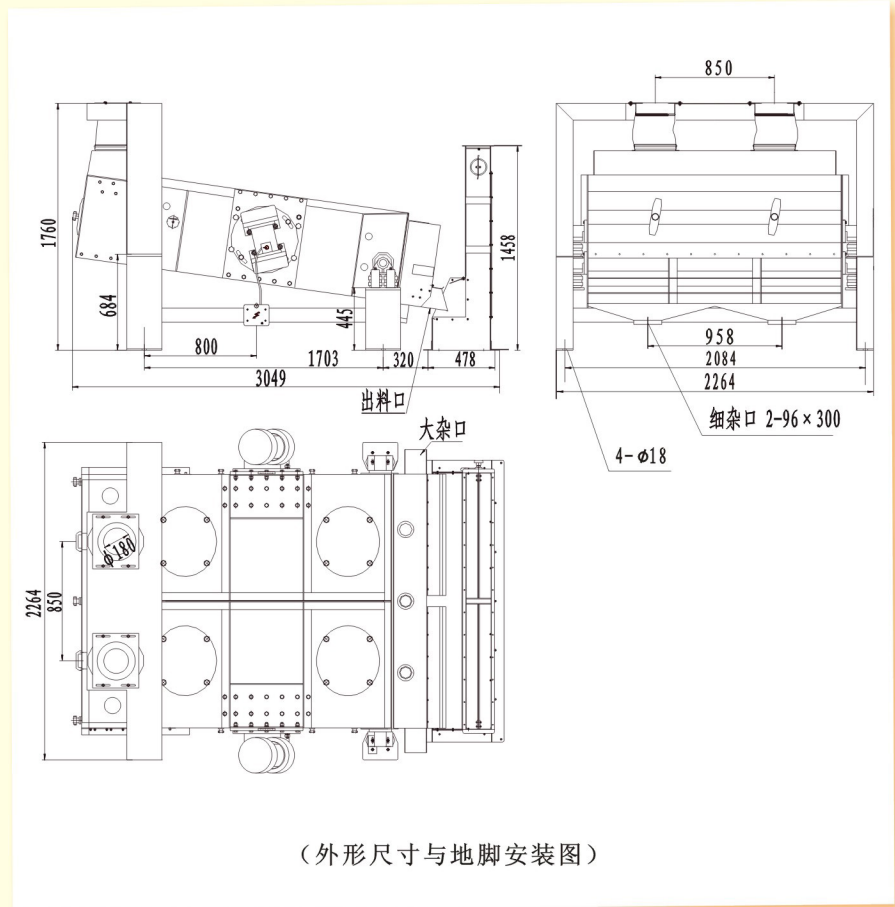

特点

- 结构紧凑，密封性好。
- 噪声小，能耗低。
- 运行平稳，清理效果好，生产效率高。
- 采用振动电机驱动，激振力大小、振动方向及筛体倾角可根据需要调节。

TQLZ 180 reciprocating separator is suitable for cleaning raw grain for grain processing plant and grain storage. The sieve of different specification can separate large, small and light impurities from wheat, paddy, corn and oil bearing materials. It is designed with double-decked sieve, and good seal. It has much better effects especially for big impurities contained in grain. It is also used for granule separation in food and chemical industry.

Feature

- Compact construction, well seal.
- Low noise, low power consumption.
- Stable movement, well cleaning effect, higher production efficiency.
- Driven by vibrating motor, the vibrating force, vibrating direction and inclination of sieve cover can be adjusted according to the requirement.

主要技术参数

型号Type	TQLZ180
处理量Output (t/h)	15-22
主机动力Power (kW)	2X0.75
风量Air volume (m ³ /min)	160
机重Weight (kg)	1670

通过ISO9001国际标准质量体系认证
